

RCW 39.10.300

Consider the following deletions:

(2) Subject to the process in RCW [39.10.270](#) or [39.10.280](#), public bodies may use the design-build procedure for parking garages, ~~regardless of cost.~~

(3) The design-build procedure may be used for the construction or erection of portable facilities as defined in WAC 392-343-018, ~~preengineered metal buildings,~~ or not more than ten prefabricated modular buildings per installation site, regardless of cost and is not subject to approval by the committee.

From Walter Schacht: Note that (a) it is probably not possible to construct a parking garage for less than the \$2 million threshold and (b) there is no clear definition of what constitutes a “pre-engineered building.”
