Director, Department of Enterprise Services
PO Box 41401
Olympia, WA 98504-1401

Subject: 2014 Agency Report
Executive Order 15-06: Achieving Energy Efficiency in State Buildings

The Washington State Department of Transportation (WSDOT) submits its 2014 Report and Agency Progress Checklist related to Executive Order 12-06. Our corporate efforts to manage energy efficiency across our building facilities directly tie to WSDOT's focus on sustainable practices that promote conserving resources for future generations.

Managing energy efficiencies in aged buildings is challenging. Statewide, WSDOT manages 3.7 million square feet of owned and leased buildings that support the department's diverse business operations. A majority of our owned buildings (3.2 million square feet) are 26 to 50 years old or older. Without reconstructing entire buildings or replacing major building systems and equipment, it is difficult to meet current energy code requirements. To mitigate this challenge, WSDOT actively seeks to identify and replace building components and equipment to achieve reduced energy costs – within limited funding constraints. During 2014, WSDOT completed 10 projects that will result in measurable energy savings. These specific emergent projects, which included lighting and HVAC system replacements, were driven by a need to ensure safe and functional work environments for department staff.

Since 2010, WSDOT has led state agency implementation of laws to improve the energy efficiency at state buildings (RCW Chapter 19.27A.190). Going forward, we will continue to focus on our building facilities with high energy usage with the intent to implement energy efficiencies where practicable. Please contact Yvonne Medina, State Facilities Administrator, at 360-705-7890 if you have any questions regarding WSDOT's submitted documents.

Sincerely,

Cam Gilmour
Deputy Secretary

Executive Order 12-06 Report

ACHIEVING ENERGY EFFICIENCY IN STATE BUILDINGS

December 2014

Agency Name:	Department of Transportation
Agency Point of Contact:	Yvonne Medina
Point of Contact Title:	State Facilities Administrator
Telephone Number:	360-705-7890
E-mail Address:	medinay@wsdot.wa.gov

Describe benchmarking, metering, audits, and energy retrofits completed by the agency in 2014 to meet the requirements of EO 12-06:

Benchmarking: As outlined in our 2012 initial report - after consulting with the Department of Enterprise Services and Department of Commerce, WSDOT identified that 34 out of its total 54 Reporting Public Facilities (RPF) sites were large facilities where focused benchmarking and energy use analysis would provide measurable, sustainable and practical benefits. Since 2012, WSDOT has specifically focused on these 34 RPF sites which contain 134 buildings. The sites are located across the state and contain diverse functions which include regional headquarters, and large maintenance facilities and with extraordinary energy use (such as mountain pass complexes).

Auditing: Of the 134 buildings at the 34 RPF sites, 44 buildings were determined to require investment grade audits. No identified projects were initiated due to funding limitations and a lack of direct allocations for this effort.

Separate but related to EO 12-06 efforts: During 2014, WSDOT completed 10 projects, including projects at four of the identified 34 RPF sites that will result in measurable energy savings. These specific emergent projects included lighting and HVAC system replacements to ensure safe and functional work environments for department staff.

Describe benchmarking, metering, audits, and energy retrofits that the agency plans to implement in 2015 to meet the requirements of EO 12-06:

In 2015, WSDOT will continue to benchmark its 34 RPFs where focused benchmarking and energy use analysis will provide measurable, sustainable and practical benefits. As more utility companies provide automated data into Portfolio Manager, WSDOT will pursue future opportunities to increase these

Executive Order 12-06 Reporting Form

efforts across our owned and leased building portfolio.

Describe how the agency used Energy Star Portfolio Manager benchmarking in lease negotiations for new or renewed leases in 2014:

In 2014, WSDOT did not negotiate or renew leases that require benchmarking.

Describe actions that will be taken to save energy through operational changes and continuous monitoring using Portfolio Manager in 2014:

WSDOT's operational tempo is affected by many factors which affect the use of energy at building sites. Regulatory and statutory mandates such as stormwater permit regulations can directly increase staffing and/or hours of operation. Construction of new buildings also has the potential to increase the agency's overall building energy usage. A current example is construction of a new Traffic and Emergency Management Center which begins operation in 2015. Benchmarking of specific key facilities in WSDOT's portfolio will allow focused evaluation to monitor and evaluate energy use trends through regular reporting. Data will be evaluated in the context of business operations, occupant use, seasonal impacts and building age and/or conditions.

Sustainability efforts and operational efficiencies are an active focus of discussion across all department business units. WSDOT is an active member of the Washington State University's Energy Extension Program Plant Operations Support Consortium. We participate in the Consortium's annual Energy Conference and partner with them for technical expertise for energy data monitoring with the Portfolio Manager program.
