Capital Projects Advisory Review Board

c/o Talia Baker, Administrative Assistant
Department of Enterprise Services

Re: Project Review Committee Vacancy – Design Industry Architect

Dear Board Members:

Please consider this my official letter of application for reinstatement to the Project Review Committee for the Design Industry – Architect position.

I am currently a Principal at NAC Architecture, a nationally recognized design firm with offices in Spokane, Seattle, Los Angeles, and Columbus, OH. I have been a licensed architect in Washington since 1992.

For me, serving on the PRC for the past three years has been extremely satisfying, both personally and professionally. This position has allowed me to meet and connect with other committee members and has given me a renewed appreciation for the many different perspectives critical to the wide range of construction projects throughout the state of Washington. Through this collaboration, I have been able to build my knowledge and experience in alternative project delivery methods through the sharing of lessons learned, industry standards, and unique project approaches to fit a variety of needs.

My personal background includes leading design teams through sixteen Design-Build and GC/CM projects in Washington State including WSU's first major D/B project on their Pullman campus, the Northside Residence Hall.

My passion for alternative project delivery methods runs deep, not only for how they might affect architects in Washington, but on a larger scale how they affect public projects across the state. I feel I still have some unfinished business and would like nothing more than to continue in this role alongside my incredibly knowledgeable committee colleagues, educating and mentoring others in the nuances of alternative project delivery.

I have included three references with contact information below. Thank you very much for your consideration and I look forward to serving another term on the PRC. If you have any further questions or would like additional information, please email me at tgolden@nacarchitecture.com or call me at 509.623.2353.

Sincerely,

Thomas E. Golden, AIA, LEED AP
Principal Architect
