Re: Project Review Committee  
Open Seat Specialty Contractor

I would like to reapply for the Project Review Committee Specialty Contractor position. During the past six years on the PRC I have provided valuable knowledge to the committee from a specialty contractor standpoint and also as a business owner. With 60% of Shinn's work being public I am able to use my personal experiences to provide insight to the PRC on problems that specialty contractors face on a day to day basis.

I am passionate about mechanical construction and dedicated to continually improving the industry as a whole. I have a proven record of implementing innovative, unique, and efficient solutions to complex issues in mechanical construction. My 40 years of ethical and fair business practices make me a positive leader in the industry.

Being on the PRC for the past six years has been a rewarding experience for me. I would be honored to serve another term on the committee.

Thank you for your consideration and support.
